MODULE MEMJET EVO POWER - DUCATI - MV AGUSTA - APRILIA

MODULE MEMJET EVO POWER - DUCATI - MV AGUSTA - APRILIA

Le module Memjet EVO power a la particularité d' agir sur certains des capteurs de température et de pression qui sont d'origine sur votre moto afin de changer les valeurs de sortie , et donc ces valeurs vont être traité par l'ecu de votre moto qui va ajuster le mélange de carburant avec des temps d'injection progressifs, cela est une garantie afin de ne pas causer des dommages au moteur, tout en augmentant les performances et enrichissant le ration mélange air/essence.

Ce type de capteur se trouve pour 90% des cas pour les modèles Ducati dans la zone entre le tableau de bord et le phare avant.

Cette gamme de boitier vous permet d'augmenter la valeur du ratio air /essence jusqu'à ce que vous trouver le meilleur mélange pour votre moto.

L'installation est complètement plug and play sans aucune modification et totalement réversible en quelques minutes .

Bien sur ce module ne remplace pas une reprogrammation boitier sur l'ecu niveau performance , mais il est particulièrement destiné aux personnes ne souhaitant pas ou ne pouvant pas effectuer de reprogrammation de boitier suite à la garantie constructeur ou bridage éventuel mais souhaitant effectuer le montage d'un échappement et filtre à air racing .

Merci de nous préciser lors de l'achat le modèle exact de votre moto .
