PLAQUETTES DE FREIN DUCATI ACCOSSATO RACING

PAIRE DE PLAQUETTES DE FREIN AVANT DUCATI ACCOSSATO RACING AGPA141ST

Prix pour une paire de plaquette en Métal Fritté - Sinter

Les plaquettes de frein ST Accossato sont réalisées par frittage, c'est un processus de production qui permet la meilleure stabilité des performances et une haute adhérence des plaquettes sur les disques.

La particularité de ces composés permet de réduire les effets de fading à des températures très élevées.

Ce type de composé a été créé pour garantir un niveau élevé et constant d'adhérence à hautes et basses températures, ce qui donne aussi une bonne adhérence sur sol mouillé
